Introduction

Our determination to continually improve services for children young people in need of help and protection and champion the interests of children in our care and care leavers is clearly set out in the council's corporate plan 2018-2022¹. As a partnership we have also set out a shared vision and clear priorities around safety, health and learning for all children and young people in Croydon in our Children, Young People and Families plan 2020-24².

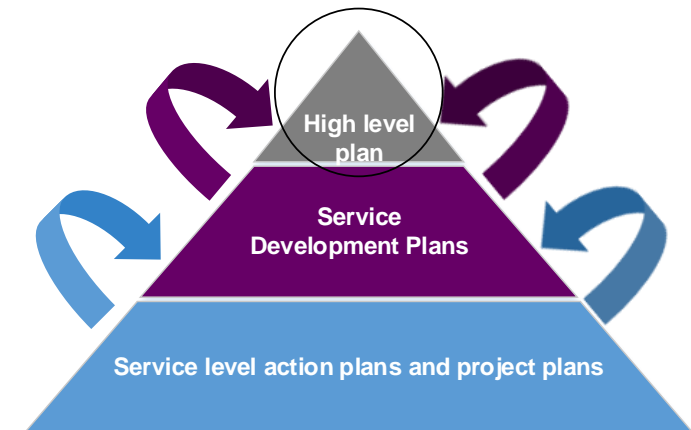

Vision: *'Working together to make Croydon a place where all children and young people feel safe, healthy and happy.'*

Ofsted recognised during their re-inspection of Croydon's Early Help and Children's Social Care Services in January and February 2020 that services for children and families have been "transformed" through strong corporate and political support and leaders were creating the "right conditions for effective social work", resulting in an overall effectiveness grading of 'Good'.

However, we cannot be complacent and will build upon the momentum and success of our ambitious and comprehensive improvement programme to deliver outstanding outcomes for children and young people by 2022. This aspiration is simply described in appendix 1 "Who we are and where we are going" and outlines four key areas of work underpinned by 6 key principles, the values that guide all our work.

This high level plan and the priorities within it respond to the recommendations and areas for development in the March 2020 Ofsted report³ and articulates the service innovation priorities that will help us to achieve outstanding outcomes for children, young people and families.

The 'plan for continuous improvement' is underpinned by service development plans owned by Heads of Service in Children, Families and Education and across the Council, and cross cutting multi-agency plans overseen by senior leaders. These plans detail clear actions, owners and timescales against which progress is monitored by the Executive Director. Underneath these are more granular action and project plans. The high level work streams (pillars) and underlying priorities of our plan for continuous improvement are set out in the graphic below.
