

COROMANDEL COAST

We are a profit-for-purpose business based in the UK.

We source and roast shade-grown, specialty coffee from the ancient lands of southern India.

We've been trading since April 2018.

Our coffees are available online, through design-led events and from our South London store.

OUR VALUES

Sustainability is at the very heart of what we do.

Shade-grown coffee i.e. coffee grown under the lush canopy of forest trees, mainly those of fruits and spices, has a positive social and environmental impact.

The forest trees fight climate change, prevent soil erosion, protect bio-diversity, and also offer sustainable livelihoods to small-holder farmers.

Simply put, shade-grown coffee approaches sustainability from a multitude of angles.

Shade-grown is climate-smart.

OUR DIRECT IMPACT

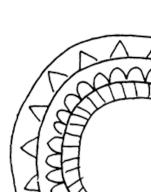

The **UN Sustainable Development Goals 2030** is our impact North Star.

It is estimated that every cup of sun-grown coffee contributes to approximately 3 cubic centimeters of deforestation. (daily global estimates of coffee consumption stands at over 2.25 billion cups of which only 1% is known to be shade-grown!).

Coromandel Coast, with its focus on shade-grown coffee, lends itself to supporting and achieving these:

Goal 15 (Life on Land)

Goal 13 (Climate Action)

OUR DIRECT IMPACT

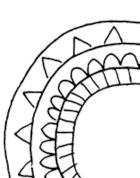

Over the last few years global coffee prices have come down drastically. Currently the C price stands at 2.43 USD/kg (October 2020).

Through our direct and indirect trade partnerships, we pay 3-4 times the global price which ensures not just fair but better, stable pricing.

Achieving SDGs 1, 2, 5, 8 and 10

Note: Our direct trade is with small farms with an annual output of no greater than 5-10 tonnes.

Our indirect trade is mainly with a farmer cooperative Small and Marginal Tribal Farmers Mutually Aided Cooperative Society (SAMTFMACS) in the Araku Valley.

OUR DIRECT IMPACT

100% plastic free

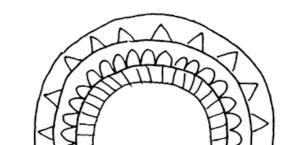

When we started, our goal was to be plastic-free by the end of 2018.

We hit that critical milestone sooner.

Since September 2018, our packaging has been plastic-free (before the Plastic-Free mark came into being).

So far we have removed 37,474 pieces of plastic from circulation/landfill.

SDG - 14 (Life Below Water)

OUR INDIRECT IMPACT

Journeying to zero-waste

We are constantly looking for ways to re-purpose our coffee waste. Mainly, used grounds from our coffee shop. To this end, we've piloted a vegan and natural skincare range.

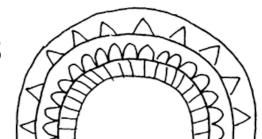

We believe the future is circular. We're in talks with specialists to make soil from our waste.

It's a project we're most excited about.

SDGs - 12 and 13

Powered by clean energy

Our roastery and shop run on renewables. SDG - 13

OUR GIVING PARTNERS

We offer micro-credit to women farmers in South East Asia through Lend With Care and Kiva.

We partner with B1G1 to align our giving with those SDGs and communities that we may not have a direct impact on through coffee. We choose rural projects that aim to:

- eradicate poverty
- offer quality education
- ensure good health and well-being
- provide clean water and sanitation
- reduce inequality

Our aim is to give back what we take from the coffee growing regions.

OUR SDG IMPACT MATRIX

OUR IMPACT TO DATE

315,687 units of impact, and counting...

56,233
pieces of single-use plastic diverted from landfill.

141,999
square centimetres
of deforestation prevented.

117,465
lives impacted globally.

Risk Assessment - Covid-19 Reopening

FILTR by Coromandel Coast

Assessment carried out by: Veena Isoaho

Date assessment was carried out: 1/06/2020

Date of next review: TBC when guidelines/ regulations change

What are the	What are you already doing to control	What further action	Who needs	When is	Done
Hazards?	the risks?	do you need to take	to carry out	the action	
		to control the risks?	the action?	needed	
				by?	
Too many employees behind the counter	Initially run only by founder/s only. Once seating is in place, bring one extra staff member on busy days only. One barista and one front of house /food person at any given time. All returning staff will be briefed on social distancing and other health & safety rules.	Reviewed when more staff members return	Veena	Ongoing	
Vulnerable employees on site	Communication sent to staff asking them to inform us if they (or members of their household) are isolating.	Revised once government changes guidance on isolating.	Veena	Ongoing	

Deteriorating mental health of employees	Keep an open channel of communication with employees. Be empathetic towards them feeling anxious about working on the floor during busy times. Keep in touch with them regularly to check if their	Continue with regular contact.	Veena	Ongoing
Employees who should self-isolate comes to work	mental health is okay. Clear guidelines given on when to stay home. Staff members displaying symptoms will be sent home immediately if at work.	Consider temperature checks on entrance as staff numbers increase above 3.	Veena	Ongoing
Customer who should be self-isolating enters	If symptoms are obvious, they will be asked to leave. Reduce seating by 40-50% to make room for distancing. Stacked shelves to be used as screens to prevent transmission when no symptoms displayed.	Once tracking app released, monitor risk level in the area.	Veena	Ongoing
Risk of transmission between staff	Handwashing mandatory upon entry and every 20 mins. Signs in place reminding them to do so. Enough paper towels to dry hands. Clean clothes and clean aprons must be worn every day. If staff use public transport, all items from outside must be stored in the stock room, separately.	Reviewed when more staff members return Continued review as guidelines are updated.	Veena	Ongoing

If more staff are required, create working zones for each role. The staff member must stay in their zone. However, if needed to go into each other's zones, if they touch anything, they are to clean hands immediately and stay working back to back. When standing face to face they are to stay 2 metres away from each other. Always maximise ventilation by having the doors open when able. As colder weather approaches keep the back door open and have the heating on at the front. Use separate utensils, or wash hands immediately after shared use. Staff may wear their own face coverings at their own discretion unless guidelines change. Wash the toilet and basin area after each use. All counters and tables to be sanitized every 30 mins.
